

Fight The Bite

Don't spray the bugs with the bug repellent, just spray some all over your body.

If there's anything out that has water in it and you're not using it, dump it out and dry it because mosquitoes breed in water.

Stay away from bushes, trees or the woods because mosquitoes live in them.

When the sun starts to go down, cover your arms and legs with clothing because that's when the mosquitoes like to come out.
